

Brainstorming & Idea Prioritization

ComicCraft – AI Comic Story Creator

Document date: 3 October 2026

Team ID: SWTID-2026-2688

Team Size: 5

Team Leader: Annamalai H

Team Members: Harikrishnan M, Deepanraj S, Arunagiri A, Dineshkumar V

Objective

Explore a practical workflow that converts a creator’s short prompt into an illustrated, exportable comic while keeping the process approachable for non-artists.

Ideas generated

- Generate a structured five-panel outline with Gemini Flash.
- Expand the outline into panel-by-panel narration, dialogue, and visual direction using a suitable Gemini model.
- Generate consistent character and setting imagery using Stable Diffusion; evaluate reference-image or prompt-reuse approaches for consistency.
- Build a responsive web interface using FastAPI and Jinja2 templates.
- Compile panels, captions, and dialogue into a PDF using FPDF.

Prioritization

Idea	User value	Feasibility	Priority
Prompt-to-panel outline	High	High	Now
PDF export	High	High	Now
Illustration generation	High	Medium	Now / prototype
Character consistency controls	High	Medium	Next iteration
Advanced editing tools	Medium	Medium	Later

Priorities are provisional and should be validated through user testing and implementation feasibility checks.
