

# Proposed Solution

## ComicCraft – AI Comic Story Creator

Document date: 3 October 2026

Team ID: SWTID-2026-2688

Team Size: 5

Team Leader: Annamalai H

Team Members: Harikrishnan M, Deepanraj S, Arunagiri A, Dineshkumar V

### Proposed solution table

| Element              | Description                                                                                                                  |
|----------------------|------------------------------------------------------------------------------------------------------------------------------|
| Problem statement    | Difficulty creating comic books without professional illustration and layout skills.                                         |
| Idea / solution      | An end-to-end FastAPI web application using Google Gemini for story structure and Stable Diffusion for generated imagery.    |
| Novelty / uniqueness | Automated text-to-comic workflow combining panel-level narrative, generated visuals, and instant multi-page PDF compilation. |
| Primary users        | Aspiring creators, educators, hobbyists, and content creators.                                                               |
| Expected outcome     | A shareable comic draft generated from a concise user prompt.                                                                |

### Scope boundaries

The first version focuses on prompt submission, panel/script generation, image generation, basic layout, and PDF export. Advanced editing, guaranteed character identity consistency, collaboration, and commercial publishing controls are future considerations.
